

UNDER CONTROL QUAD

Short Description

Compressive in all the details - ventilated fibre, latest compressive tubes, and seamless construction – this short improves muscle oxygenation thanks to blood flow being stimulated. Vibrations are reduced by 30% and risks of injury are limited. Thanks to ventilation bands directly integrated in the fibre, it is a soft running apparel that causes no discomfort and that you will put on easily.

Key Benefits

Oxygen compression

A millimeter-precision compression graduation in the targeted areas brings oxygen to the muscles and therefore enhances performances and facilitates recovery. The muscles are supported for a feeling of strength and a better performance on a longer distance.

Second skin cut

Thanks to the ultra-thin and extensible fibers, the quads are knitted to fit every curve of your thighs for a natural fit and does not move.

360° ventilation

The ventilation zones are integrated all around the thigh for maximum oxygenation.

Sizing Chart

		T1	T2	T3	T4

UNDER CONTROL QUAD TECHNOLOGIES

ONE HEMLESS LAYER

Seamless and without elastic, the upper part of the sock does not compress the leg, thus relieving the pressure in that area.

COMPRESSION OXYGEN

A millimetre-precision compression graduation in the targeted areas brings oxygen to the muscles and therefore enhances performances and facilitates recovery. The muscles are supported for a feeling of strength and a better performance on a longer distance. Ultra-extensible, the fiber is also more breathable for a maximum comfort.

INTEGRATED VENTILATION ZONES

Innovative technology, the ventilation stripes directly integrated into the compression provide optimal ventilation evacuating heat and perspiration.

THERMO-REGULATION

Its unique weaving favors the circulation of the air and allows a perfect balance between the outside and the interior.

SHOCK ABSORBER

The 360° compression dampens the "shock wave" effect on muscles, veins and joints.

SEAMLESS

For optimum comfort, the microfibre is 100% seamless, lightweight and very soft.

HYDROPHOBIC

The water-repellent fibre wicks moisture away and evacuates sweat without absorbing it, even when excessive.

ERGO FIT

Thanks to the ultra-thin and extensible fibers, the short is knitted to fit every curve of your body perfectly, maximizing its efficiency and comfort (no chafing).

ULTRALIGHT

Does not retain water and will remain featherlight in all conditions.

MASSAGING FIBER

Every movement triggers a micromassage providing well being and lightness. Patented fibre

All COMPRESSPORT® products are covered under a 2-year exchange guarantee and will be refunded if the user is not satisfied within 30 days following purchase.
